

Galaxy

UFL is an industry leader in the manufacture and supply of a wide selection of landside and airside products including mass seating, counters, passenger facilitation, hospitality, lounge and complementary furniture.

We manufacture using high-performance materials, featuring ergonomic design for superior passenger comfort and space economy. To deliver the optimum passenger experience we tap into global trends, new materials and innovative technology, to meet your needs through innovative products, advice and customisation.

UFL has a commitment to quality and sustainability in both design and manufacture. We hold ISO 9001 certification.

Wherever possible, we consider each product's lifecycle, choosing materials and components which can be reused and recycled. We're also consciously working to reduce our carbon footprint and impact on the planet.

UFL is a proud member of ACI Airports Council International.

Galaxy counters can be used throughout the airport journey. Manufactured using acrylic and compact laminate, this range is strong, durable and aesthetically pleasing with rounded corners and sleek, contemporary low-profile edges.

Each Galaxy counter can be customised with your branding and messaging. These are protected from damage behind a toughened floating glass panel, which can be easily removed to update visuals, so you can refresh the look of your Galaxy counter without an expensive refit.

The Galaxy combines form with full functionality. Cabinets have built-in CPU cupboards as standard, cut-out scale readers and pull-out printer drawers, plus durable features like trolley guards, kick plates and side fins. We can also tailor our counters to meet the specific needs of any domestic or international airport.

Made using the latest high performance materials, Galaxy is available for use as check-in, mobility and gate counters as well as information desks for general terminal enquiry.

UFL is committed to manufacturing and supplying airport products that provide the convenient and functional solutions you need.

Galaxy offers functional counter solutions from landside to airside.

Features

Galaxy delivers strength with durability and a contemporary look with rounded corners and low profile edges

Floating glass panel

The panel is made from toughened glass. It's easily removed and clipped back into place using stainless steel pins to enable brand messaging/ advertisements on the front panel to be easily updated

Note: Can be customised as 1 or 2 pieces depending on need for bag rail

Counter tops

Made from strong acrylic for added durability

Work surface

The surface is designed using compact laminate to withstand force

Console cut-outs

Displays read out of baggage weight to operator and passenger

Carcass unit/Side panels

Manufactured entirely of compact laminate. These side panels are extremely resilient to stains and scratches

Componentry

Stainless steel finishes are used in areas of high wear and tear including:

- side fins
- trolley guard
- foot rest
- bag rail
- kick plate

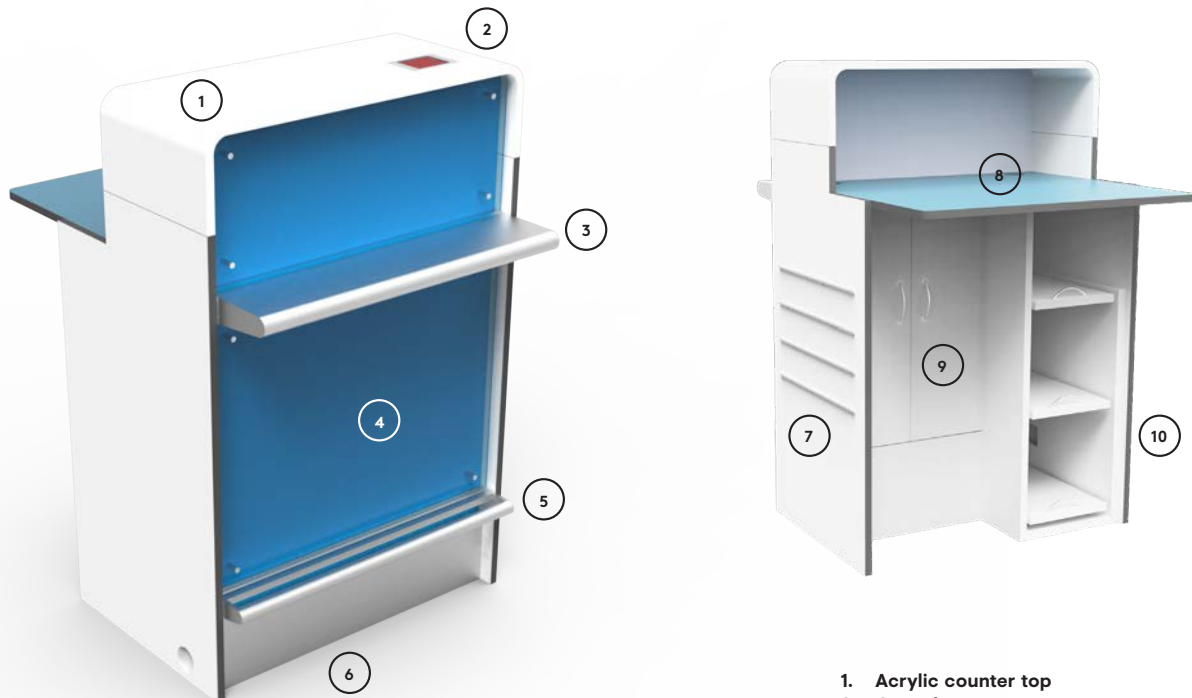

Sliding shelves

Three sliding shelving levels are available with lockable door option

CPU cupboard

Provides a clean aesthetic to hide computer and printers
