

A575

UFL is an industry leader in the manufacture and supply of a wide selection of landside and airside products including mass seating, counters, passenger facilitation, hospitality, lounge and complementary furniture.

We manufacture using high-performance materials, featuring ergonomic design for superior passenger comfort and space economy. To deliver the optimum passenger experience we tap into global trends, new materials and innovative technology, to meet your needs through innovative products, advice and customisation.

UFL has a commitment to quality and sustainability in both design and manufacture. We hold ISO 9001:2015 certification.

Wherever possible, we consider each product's lifecycle, choosing materials and components which can be reused and recycled. We're also consciously working to reduce our carbon footprint and impact on the planet.

UFL is a proud member of ACI Airports Council International.

A575 introduces a new level of refinement for airport terminal counters. Equipped with a fully acrylic body, the A575 is ideal for transiting areas and central hubs. A575 has longevity, even in the highly used areas.

THE A575 collection of counters is our strongest edit yet. The range is fully customisable for major transiting points for arrival and departure lounges. The fully moulded acrylic body is available in standard colours, but can also be manufactured to match any Pantone colour. The A575 has superior weathering properties, ideal for busy areas.

A575 is manufactured to the highest international standards to suit busy, modern airports around the globe. Using the latest high performing materials, this collection uses a combination of acrylic components that seamlessly integrate with other stainless steel and LPL components.

The A575 is produced with an acrylic body and stainless steel components that offer first level defence against trolleys and luggage as well as providing a scratch resistance surface that holds up well against sharp, coarse or abrasive objects.

This series has customisable options that can be adapted for check-in, gate and information counters with mobility, immigration and passport alternatives available. Left-and right-hand facing options are available to suit the needs of your desired footprint layout.

The A575 can provide specific application for any meeting point, transport hub and arrival and departure terminals. From check-in and gate to information and immigration counters, this design upholds superior quality while reducing long-term maintenance costs.

A575 combines practical uses with product longevity into one reliable solution.

Overview

Seamless
manufacturing

- **Available as** check-in, gate, mobility and information units as well as passport and immigration counters
- **Counter tops**
High performing scratch and stain resistant material
- **Cable management**
Channelling cables for clean and tidy working space.
Note: counters are not equipped with electrical connections
- **Warranty**
UFL supplies a 5-year structural warranty on all counters. Extended warranties are available for specific projects.
- **Custom solutions available**
